## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 14-21, and 42, drawn to cell-protein interaction method, classified in class 435, subclass 804.
  - II. Claim 39, drawn to diagnosis of a disease, classified in class 424, subclass 9.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of cell-protein interaction method of Group I are not disclosed as capable of use together with diagnosis of a disease of Group II. It is also immediately apparent to an ordinary practitioner that they have different modes of operation, different functions, or different effects .
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Sarah Kagan on July 23, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made

Art Unit: 1634

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).

#### ***Conclusion***
